“ We will redefine the way mining is practiced.

Rock Trade Industries is a recognised industry leader in the mining and extraction of sandstone and has operated in the Waterfall Quarry in Helidon since 2007.

Over recent years, Rock Trade Industries has diversified its operations and now supplies some of Australia's largest companies with high quality sandstone boulders, crushed stone, sand and gravel - and is a major producer of aggregates-based construction materials for the asphalt and concrete industry.

Rock Trade Industries is committed to creating a sustainable environment and adopting practices that redefine the way miners rehabilitate land.

Through its rigorous research and development program, Rock Trade Industries has innovated methods and processes enabling 100% of resource utilisation.

Essentially, this means all resources and by-products generated by operations from Waterfall Quarry are used, meaning there is no waste.

As we do this, we will innovate and create new products that meet the highest industry standards and the needs of our customers, and in turn, the needs of their customers.”

“ We value
our people,
our community
and our environment.

We have a responsibility as miners
and extractors to take great
care of the land we use for
commercial purposes.

Innovation is such an opportunity
to realise new ways of creating high
quality products as well as
developing new environmental and
land rehabilitation practices that
minimise our impact and our
footprint on the earth. ”
